FlashCoin & Tether USD (TUSD) - Educational Community Token
White Paper | Version 1.0

1. Introduction
FlashCoin introduces Tether USD (TUSD), a non-commercial, educational token designed to simulate and teach real-world cryptocurrency functionality.
Our goal is to empower students, learners, and online communities with practical tools to understand blockchain technologies in a safe and responsible environment.

2. Purpose
Tether USD (USDT) is not a financial product or a speculative asset.
It serves as an educational instrument to:

Promote blockchain literacy

Allow student groups to exchange services and ideas

Foster digital collaboration within learning communities

Simulate real-world token economics in a risk-free environment

3. Key Features
Educational Use: Created solely for simulation and practice in educational environments

Community-Based: Built for online communities to share knowledge and collaborate

No Real-World Value: USDT is not tradable, not listed on any exchange, and has no monetary value

Non-Speculative: FlashCoin does not promote or support speculative investment or trading

4. Target Audience
Students & educators in blockchain and finance

Developers learning smart contracts

Online community managers exploring token-based reward systems

Educational institutions conducting training and workshops

5. Technology Stack
Blockchain: Binance Smart Chain (BEP-20 token)

Smart Contract Language: Solidity

Token Name: Tether USD (USDT)

Symbol: USDT / decimals : 6

Total Supply: Fixed, for demonstration purposes only

6. Community Engagement
We encourage learners and crypto enthusiasts to:

Use USDT in mock transactions

Participate in social media challenges

Build mini decentralized apps (dApps) for education

Share ideas and feedback to improve the learning experience
